

SCIENCE 20F

Science Room
Teacher: Mr. Reimer
Semester One

Course Code: 0120
Contact Information: mreimer@trsd.ca
Credit Value: 1 credit

Welcome to Science 20F! Please read this outline carefully, sign it and hand it back to the teacher.

Course Description: Science (20F) provides a solid foundation for further study in Senior Years science courses and has a multi-disciplinary focus. Accordingly, the curriculum includes only those topics that are deemed to be of relevance to students' needs and interests or are prerequisites to the further study of science at the Senior Years level.

Goals for Students:

- encourage students at all levels to develop a rational sense of wonder and curiosity about scientific and technological endeavors;
- enable students to use science and technology to acquire new knowledge and solve problems, so they may improve the quality of their own lives and the lives of others;
- prepare students to critically address science-related societal, economic, ethical, and environmental issues;
- provide students with a proficiency in science that creates opportunities for them to pursue progressively higher levels of advanced study, preparing them for science-related occupations, and engaging them in science-related activities appropriate to their interests and abilities; and
- develop in students of varying aptitudes and interests a knowledge of the wide variety of careers related to science, technology, and support for the natural and human environments.

To help you obtain the skills and accomplish these goals mentioned, this course has been broken down into the following four units (proposed timeline included):

Unit 1: Dynamics of Ecosystems (Sept. - Oct.)	Unit 3: In Motion (Nov.)
Unit 2: Chemistry in Action (Oct.)	Unit 4: Weather Dynamics (Dec. - Jan.)

Students may be asked to bring materials from home for projects and activities.

Mark Breakdown:

Course Work	70%
Final Assessment	30%

Class Attendance: It is important for students to attend this class on a regular basis as class discussions may appear on assessment pieces. Should a student have to miss class, he/she

has the responsibility to find out from a classmate what was discussed in class and get himself/herself caught up with notes/questions/tests or quizzes.

Students who miss class will be able to find the day's lesson/assignment on Microsoft Teams.

Assessment: Each unit of study will have several formative assessments and at least one summative assessment. The formative assessments will help students demonstrate their knowledge and understanding on the variety of topics/outcomes taught in each unit. It is expected that assessments be completed by the assigned due date. Students who miss the summative assessment at the end of the unit will complete it on the day they return to school.

Incomplete and Late Work: Students are expected to complete their work on time and to the best of their ability. Late or incomplete assignments will be given a mark of zero. When the student has completed the assignment, the mark of zero will be changed. At the teacher's discretion, for every day an assignment is late, a maximum of 5% may be deducted. After two weeks or at the start of a new unit, if the assignment has still not been turned in, the student will receive a mark of zero.

Rewrites: Students who do poorly on an assessment may request to rewrite an alternative assessment. Students will have one week after the completion of a unit to request to rewrite an assessment. Students will then have one week to complete the alternate assessment. Students who do not complete the alternate assessment on time will keep their original mark. Rewritten summative assessments must be completed within one week after the original has been returned. Summative assessment rewrites will be completed over the lunch hour. Students are permitted to rewrite a total of 3 assessments throughout the semester.

Homework: Assignments not completed during regular scheduled class are considered to be homework. These formal assessments are due on the assigned due date.

Lunch Hour (12:05-1:00): Students may also come at lunch time (12:05-1:00), eat lunch, and get extra help on assignments or get caught up on work they have missed.

Academic Dishonesty: Academic dishonesty such as plagiarism, cheating, or copying work is a severe offence and will result in harsh penalties. First offence will be a choice of either a zero on the assessment or redo the assessment at lunch time. A letter will also be sent home to your parents/guardians at this time. Second offence will be an automatic zero, with a referral to administration, as well as a letter sent home to parents/guardians.

Students and Parents/Guardians: Please sign below to indicate that you have read and understand the course outline. If you have any questions or comments, please include them on the space below. If, at any time during the school year, you have questions or concerns, please call the school and leave a message. I will get back to you as soon as possible.

Sincerely,

Mr. Reimer
